OVERVIEW

Release date

February 8, 2011

Release note revision history

Date	Description
2/12/11	Updated language support. Added tier tables. Added links to security bulletins.
2/16/11	Added Spanish (win) as chained installer. Updated deployment details.

Description

The Adobe® Reader® and Acrobat® 10.0.1 release is a quarterly update for the products listed below:

- Adobe Reader
 - [10.0.1: Windows](#) for language tiers 1, 2, 3, and 4. See [Language Tiers](#).
 - [10.0.1: Macintosh](#) for language tiers 1, 2, 3, and 4. See [Language Tiers](#).
- Acrobat
 - [10.0.1: Windows and Macintosh](#) for the language tiers supported by each platform except Catalan and Basque.

Installers marked in **red** are available as full (chained installers) from the [Reader Download Center](#) and the ftp site.

Language Tiers

	Windows	Macintosh
Tier 1	English, French, German, Japanese , (Reader only: MUI Reader)	English , French, German, Japanese
Tier 2	Italian, Spanish , Dutch, Brazilian Portuguese, Swedish, Danish, Finnish, Norwegian	Italian, Spanish, Dutch, Brazilian Portuguese, Swedish, Danish, Finnish, Norwegian
Tier 3	Chinese Traditional, Chinese Simplified, Korean	Chinese Traditional, Chinese Simplified, Korean
Tier 4	Russian, Ukrainian, Romanian, Turkish, Czech, Hungarian, Polish, Slovak, Croatian, Slovenian, (Reader only: Catalan, Basque)	Russian, Ukrainian, Romanian, Turkish, Czech, Hungarian, Polish

Download sizes

Update sizes vary by product. Approximate download sizes in megabytes (Rounded to the nearest MB and based on the ENU installer where more than one language is provided):

Product	Installer type	Windows	Macintosh
Full Reader (Reader Download Center)*	full	EXE: 47	68
Reader 10.0.1 update	update	MSP: 12	90
Acrobat 10.0.1	update	22	116

Definition of release types

Adobe defines each release type as follows:

- **Major release:** A major release associated with an incremented first number (e.g. 8, or 9) and an approximate 18 month product cycle. These are only available as separate purchases or upgrades.
- **Quarterly update:** A scheduled update that includes functional improvements, new security updates, and previously released out of cycle patch updates. For Reader, these can be either patches or full installers.
- **Out of cycle patch:** An unscheduled update targeted at security fixes. These contain few functional updates with the intention to limit impact. These are usually non-cumulative patch files.

Note: Both quarterly and out-of-cycle updates provide security enhancements and fixes. Adobe recommends that all updates and patches be applied when available.

Reasons to update

This release provides feature enhancements, better stability, performance, and security. See [Improvements](#) and [Fixed Bugs](#) below for a complete list.

Deployment methods

- Acrobat updates are never full installers. All updates for any platform must be applied in order.
- Reader updates may or may not be full installers depending on the release type and language.
 - When using a patch installer, apply the patch to the supported products and platforms that have already been upgraded to the last quarterly. In this case, simply update 10.0.
 - When using a full installer, you can apply over any existing version.

End user updates

End users typically get the latest product version by doing one of the following:

- Updating the product manually by choosing **Help > Check for Updates** (Win and Mac only).
- Letting the product update itself when an update is detected if the application is configured to do so (Win).
- Downloading the full Adobe Reader installers from the [Reader Download Center](#).

Enterprise updates

Administrators and IT typically manage software installations in enterprise settings as follows:

1. Download the enterprise installers from [ftp://ftp.adobe.com/pub/adobe/](http://ftp.adobe.com/pub/adobe/). Available installers are listed on http://kb2.adobe.com/cps/888/cpsid_88814.html.
2. Installing updates via your preferred methodology such as AIP-GPO, bootstrapper, SCUP/SCCM (Windows), or Apple Remote Desktop or SSH (Macintosh).

Note: For details, see the *Enterprise Administration Guide* on the [enterprise portal](#).

System requirements changes

This release supports the base system requirements. Any differences in those requirements are noted below. For the base **system requirements** and **language support**, see the following:

- Acrobat: <http://www.adobe.com/products/acrobatpro/tech-specs.html>
- Reader: <http://www.adobe.com/products/reader/tech-specs.html>

Change history: Support that has been added or removed since 10.0

Version	Changes to base system requirements
10.0.1	None.

Compatibility and interoperability

For version-related information, see the following:

- Compatibility overview page: http://www.adobe.com/devnet/reader/articles/reader_compatibility.html.
- Version interoperability and coexisting installations, see <http://kb2.adobe.com/cps/333/333223.html>.
- PDF-capable web browsers: <http://kb2.adobe.com/cps/333/333504.html>.
- PDFMaker-compatible applications (Windows and Mac): <http://kb2.adobe.com/cps/333/333504.html>.

Improvements

Security

Numerous vulnerability fixes and security enhancements have gone into this release.

- For information about vulnerabilities associated with security bulletins, see:
 - <http://www.adobe.com/support/security/bulletins/apsb11-03.html>
 - <http://www.adobe.com/support/security/bulletins/apsb11-02.html>
- Protected Mode enhancements (Reader on Windows with Protected Mode enabled):
 - Reader is now compatible with McAfee Virus Scan Enterprise 8.7.0i.
 - Copying to the clipboard now works.
 - Entrust security software can be installed.
 - PDF files in a shared location can be opened in a distributed file system.
 - Support has been added for previewing Office 2007 Microsoft Excel content in a portfolio.
 - See also QTP Integration.

SCCM Deployment Support

This release delivers the first set of SCUP catalogs in support of SCCM deployments. Download the needed files from the following:

- http://armmf.adobe.com/arm-manifests/win/SCUP/Acrobat10_Catalog.cab

- http://armmf.adobe.com/arm-manifests/win/SCUP/Acrobat10_Catalog.xml
- http://armmf.adobe.com/arm-manifests/win/SCUP/Reader10_Catalog.cab
- http://armmf.adobe.com/arm-manifests/win/SCUP/Reader10_Catalog.xml

Flash

This release installs an updated Flash Player.

QTP Integration

- QTP performance is enhanced for certain forms.
- Reader with Protected Mode on supports recording an attempt to enter data into a non-existing form field.
- Reader with Protected Mode on supports recording data entry operations (via keyboard) in a field when the focus from the field is changed directly to another field inside the PDF.

Digital Signatures

- Acrobat stability is improved when opening a signed PDF file.
- Saving a signed file is now possible in Safari

Bug fixes

2761507 Stability of 3D part rotations is improved.

2758553 Acrobat prints 2D markups for the current view instead of all the markups.

2753379 PMIs are no longer hidden by the section plane.

2791093 Reader is now compatible with McAfee Virus Scan Enterprise 8.7.0i when Protected Mode is enabled.

2779278 Runtime error on trying to open a PDF using double click.

2774671 Reader: when printing with Protected Mode enabled and "Choose paper source by PDF page size" = ON, data in the 2nd page is cut off in printing.

2774271 Acrobat may crash when the multimedia chart is forced to reflow to the next page.

2774194 Reader now configures Mac's "com.adobe.acrobat.pdfviewer.plist."

2774170 Full MAC Reader re-install in repair mode fails with error "Found higher version of Adobe Reader in the installation location. Installation will terminate."

2774086 A Review workflow continuously asks for resources from Acrobat.com in spite of Acrobat.com responding with a 304.

2772059 MAC: Patching Acrobat X fails if Acrobat 9 or Acrobat 8 is patched before patching Acrobat X.

2771483 Acrobat reverts to English after applying the quarterly patch for localized builds.

2780566 Intermittent crash observed in DigSig.api when navigating through Preferences in Reader.

2755901 Linearized PDF (OptimizePDF) option should be the default "true" while creating a Action (.sequ) file.

2752142 Win only: Reader crashes after choosing one of the options from the Security Warning dialog that asks user for the permission to connect to a website.

2750883 AUM-Check for Updates doesn't work for Acrobat\Reader 9 if RX is installed.

2749799 PDF file content will disappear and Acrobat will crash when exiting after filling data and saving the file in a Rights Management Security PDF file that has a watermark .

2749793 Full Reader for Macintosh is not showing proper version number in file name.

2745625 Reader crashes when choosing "Send" to desktop email application when returning filled form if email client is set to Lotus Notes, the distribution originated from Standard/Pro, and the file name is Unicode.

2742895 Crash after copying text from a comment and scrolling to the next page when data already exists on the clipboard.
