OVERVIEW

Release date

March 21, 2011

Release note revision history

Date	Description
3/21/11	First version

Description

This release is a security out-of-cycle patch for the products listed in the table below.

Note: A Reader patch for Windows is not being released because Reader X with Protected Mode enabled is not subject to the associated vulnerability.

10.0.2 installers

Product	Version	Installer type	Size	Language support
Windows				
Acrobat	10.0.2	update	MSP: 487 KB	All
Macintosh				
Reader	10.0.2	update	12 MB	All
Acrobat	10.0.2	update	10.5 MB	All

Language Support

Out of cycle patches are language agnostic and can be applied over any language-specific product. The same is true for most updates, but some quarterly updates may be provided for specific languages. In those cases use the installer file name to identify the language for which the installer is intended.

Some releases include full, chained installers for certain languages from the [Reader Download Center](#) and the ftp site. When this is true, they will be highlighted in **red** below.

Multilanguage (MUI) installers: Some releases include MUI installers that provide support for multiple languages and allow the user to configure the language at install time. These are only available on Windows and are identified by _mui in the filename.

	Windows	Macintosh
Tier 1	English, French, German , Japanese.	English, French, German , Japanese
Tier 2	Italian, Spanish, Dutch, Brazilian Portuguese, Swedish, Danish, Finnish, Norwegian	Italian, Spanish, Dutch, Brazilian Portuguese, Swedish, Danish, Finnish, Norwegian
Tier 3	Chinese Traditional, Chinese Simplified, Korean	Chinese Traditional, Chinese Simplified, Korean
Tier 4	Russian, Ukrainian, Romanian, Turkish, Czech, Hungarian, Polish, Slovak, Croatian, Slovenian,	Russian, Ukrainian, Romanian, Turkish, Czech, Hungarian, Polish

(Reader only: Catalan, Basque)

Definition of release types

Adobe defines each release type as follows:

- **Major release:** A major release associated with an incremented first number (e.g. 8, or 9) and an approximate 18 month product cycle. These are only available as separate purchases or upgrades.
- **Quarterly update:** A scheduled update that includes functional improvements, new security updates, and previously released out of cycle patch updates. For Reader, these can be either patches or full installers.
- **Out of cycle patch:** An unscheduled update targeted at security fixes. These contain few functional updates with the intention to limit impact. These are usually non-cumulative patch files.

Note: Both quarterly and out-of-cycle updates provide security enhancements and fixes. Adobe recommends that all updates and patches be applied when available.

Reasons to update

This release provides feature enhancements, better stability, performance, and security. See [Improvements](#) and [Fixed Bugs](#) below for a complete list.

Deployment methods

- Acrobat updates are never full installers. All updates for any platform must be applied in order.
- Reader updates may or may not be full installers depending on the release type and language.
 - When using a patch installer, apply the patch to the supported products and platforms that have already been upgraded to the last quarterly. In this case, simply update 10.0.1.
 - When using a full installer, you can apply over any existing version.

End user updates

End users typically get the latest product version by doing one of the following:

- Updating the product manually by choosing **Help > Check for Updates** (Win and Mac only).
- Letting the product update itself when an update is detected if the application is configured to do so (Win).
- Downloading the full Adobe Reader installers from the [Reader Download Center](#).

Enterprise updates

Administrators and IT typically manage software installations in enterprise settings as follows:

1. Download the enterprise installers from [ftp://ftp.adobe.com/pub/adobe/](http://ftp.adobe.com/pub/adobe/). Available installers are listed on http://kb2.adobe.com/cps/888/cpsid_88814.html.
2. Installing updates via your preferred methodology such as AIP-GPO, bootstrapper, SCUP/SCCM (Windows), or Apple Remote Desktop or SSH (Macintosh).

Note: For details, see the *Enterprise Administration Guide* on the [enterprise portal](#).

System requirements changes

This release supports the base system requirements. Any differences in those requirements are noted below. For the base **system requirements** and **language support**, see the following:

- Acrobat: <http://www.adobe.com/products/acrobatpro/tech-specs.html>
- Reader: <http://www.adobe.com/products/reader/tech-specs.html>

Change history: Support that has been added or removed since 10.0

Version	Changes to base system requirements
10.0.1	None.
10.0.2	None.

Compatibility and interoperability

For version-related information, see the following:

- Compatibility overview page: http://www.adobe.com/devnet/reader/articles/reader_compatibility.html.
- Version interoperability and coexisting installations, see <http://kb2.adobe.com/cps/333/333223.html>.
- PDF-capable web browsers: <http://kb2.adobe.com/cps/333/333504.html>.
- PDFMaker-compatible applications (Windows and Mac): <http://kb2.adobe.com/cps/333/333504.html>.

Improvements

Security

This security patch primarily provides vulnerability mitigation. For information, see: <http://www.adobe.com/support/security/advisories/apsa11-01.html>.

Flash

This release installs an updated Flash Player for reason associated with the bulletin above.

Bug fixes

This is a security update only.
